

Developing Cognitive and Language skills

In our continuous endeavor of building a strong community, in the month of November and December, EP organised workshops for the parents. The topics were 'Developing Cognitive and Language skills' in the month of November.

Another workshop was organised this month on 'Environment and Behavioural challenges in Early Years'.

The workshop on 'Developing Cognitive and Language Skills' gave parents an opportunity to reflect on their routines. The importance of routines and how to engage meaningfully with their children to enhance thinking and language skills.

The workshop on 'Environment and Behavioural challenges in Early Years' gave parents insights into what the environment consists of, age-appropriate behaviours and how to go about dealing with challenging behaviour.

It was a pleasure to see parents taking interest and participating with so much enthusiasm.
